### Commercial

The Landings,  
Burton Waters, Lincoln

The Landings project provides a mixed development comprising a range of commercial and retail units at ground floor level with 13 townhouse properties above. Located within the Burton Waters development the scheme is designed to provide local facilities and specialist service outlets. Frontages to the units face onto a new public promenade adjacent to the marina. The townhouses are designed over three storeys and benefit from generous terraced gardens and balconies which take advantage of this unique waterside setting.
