Student accommodation
Brayford Quays
Lincoln

The infill site is located on the bank side of Brayford Pool in the heart of Lincoln and connects with Newland to the north.

The scheme is designed around 3 separate building structures which combine to provide a pedestrian route through the scheme. The proposal provides a number of commercial units at ground floor level with approximately 350 student bed spaces above.

The architectural language is inspired from a reworking of the simple warehouse structures which historically surrounded the Brayford Pool.
